

DON'T EXTRADITE ASSANGE

One of the foremost publishers of the past 50 years is in a UK prison, detained on behalf of the US government.

Julian Assange is accused of publishing the truth about war crimes, corruption and climate policy.

Agnes Callamard
Secretary General of
Amnesty International

"Assange must NEVER be extradited to the USA. It's a serious threat to him personally and freedoms we usually honor, such as press freedom, freedom of expression and FOI."

Nils Melzer
UN Special Rapporteur
on Torture

"The case is a huge scandal and represents the failure of Western rule of law. If Julian Assange is convicted, it will be a death sentence for freedom of the press."

Dunja Mijatović
Commissioner for
Human Rights,
Council of Europe

"Julian Assange's potential extradition has human rights implications that reach far beyond his individual case."
