

URGENT

A court in Great Britain ordered the extradition of Julian Assange to the United States. This decision leads to a death sentence for defending freedom of the press.

We call on all media, journalists who fight for freedom to speak out and demand the freedom of Julian Assange who with civic courage, publishes US documents that violate human and peoples' rights.

Allowing Julian to be extradited is a threat to freedom of the press and a grave warning to those who question the repressive policies and serious violations of human and peoples' rights committed by the United States.

Julian Assange is a victim of US policy of oppression for defending freedom of the press.

We reject the decision of the British justice system and demand the freedom of Julian Assange.
